ThermJet Delivers the Highest Operating Velocities & Lowest Emissions Available

Eclipse ThermJet burners produce an intense stream of gases that penetrate the load with such precise temperature uniformity that you’re assured of getting consistent product quality and the utmost system efficiency. But that’s not all. You get patented staged air and gas mixing for the lowest emissions in the industry, exclusive integrated gas and air orifices, dependable ignition anywhere in the firing cycle and extra-long tube life.

For more information on the performance-leading ThermJet, contact your local Eclipse sales office or call (800)800-3248.
