

Combustion Leadership Program (CLP)

As one of the leading suppliers of industrial heating solutions worldwide, Eclipse relies on its engineers to help define our identity today and for the future. Through the Eclipse community worldwide, engineers help lead our innovations, our unique customer solutions, and our world-class network of combustion sales and services.

The Eclipse Combustion Leadership Program is the foundation for developing our engineering leadership of the future. The two year program includes challenging and diverse assignments to give CLP members a sound basis in combustion knowledge and industrial applications, while allowing program members an opportunity to experience different aspects of engineering to help focus on a career path that best aligns with their passions and preferences.

Completion of the CLP is only just the beginning. Once completing the Combustion Leadership Program, alumni are eligible to apply for any Eclipse or Eclipse subsidiary opening worldwide.

CLP Requirements

Any engineer graduate with a bachelor's degree in an engineering discipline and entering Eclipse directly out of school is encouraged to apply to the Eclipse Combustion Leadership Program. You will get the opportunity to understand the chemistry of combustion in our world class laboratory while also helping with various installations of combustion equipment in unbelievably varying applications; from steel mills, to automotive plants; from industrial baking ovens to ceramic kilns; and many, many applications in between.

As a CLP member, possible assignments during the first two years include:

- Test Engineering
- Field Service Engineering
- Designer
- Inside Sales Engineering
- Manufacturing Engineering

You round out the core programs with your chosen electives to best meet your career interests!

Are you a recent or soon-to-be graduate engineer?
We are interested in talking to you about a career at Eclipse!
